From: **Mean Green Mowers** <donotreply@meangreenproducts.com>

Dear Valued Customers, Dealers, and Distributors,

I am pleased to announce that Mean Green Mowers is being acquired from Generac Power Systems, Inc. by a group of investors, employees, and industry veterans, effective June 1, 2026.

This transition marks an exciting return to our roots as a focused, specialized design and manufacturing company. As part of this change, all core operations including engineering, product design, manufacturing, service support, parts, and sales will be centralized at our facility in Ross, Ohio, where Mean Green was originally founded. Bringing our team back together under one roof will allow us to operate more efficiently and respond more quickly to your needs.

We are grateful for the guidance and support provided by Generac during our time together and value the experience we gained as part of their organization.

As we complete the transition and restart manufacturing, we are committed to elevating both customer support and product quality to the next level. With our teams fully integrated in one location, we will be able to shorten response times, improve parts availability, enhance communication, and ensure tighter quality control throughout the entire product lifecycle. Our goal is simple: deliver a better overall experience from product performance to service support than ever before.

Looking ahead, we are excited to accelerate the development of new and innovative products. Our focus remains on delivering quiet, eco-friendly solutions that compete directly with gas-powered equipment while providing meaningful performance and cost advantages to our customers.

We are energized by this new chapter and look forward to strengthening our partnership with you as we continue to grow the Mean Green brand.

Best regards,

Matt Conrad
President
